# Adding Support for Writing String values from Streams

## #507

 **Open** elarkin wants to merge 1 commit into `JamesNK:master` from `elarkin:master`

 Conversation **0**

 Commits **1**

 Files changed **4**

elarkin commented 12 days ago

I have a need to write very large JSON strings (100MB+), and storing the entire string in memory before writing it to the JSON output stream is causing my agents to go OOM.

This change allows me to stream into a large string.

NOTE:

- In order to keep the new Streaming method in line with the String method, I made them quickly converge to the same code path. This causes writing String values to become a bit slower.

# Introducing RICE, the tool

## Aggregations: Be lenient when converting local to utc time in time zone roundings #10031

**Closed** cbuescher wants to merge 2 commits into `elastic:master` from `cbuescher:fix/10025`

Conversation 1 Commits 2 Files changed 2 Related Files

cbuescher commented 16 days ago

Owner

This solves a problem in the time zone rounding classes where time dates that fall into a DST gap will cause joda time library to throw an exception. Changing the conversion methods 'strict' option to false prevents this.

Closes #10025

Aggregations: Add 'offset' option to date\_histogram, replacing 'pre\_offset' and 'post\_offset' <br> <br> Add offset option to 'date\_histogram' replacing and simplifying the previous 'pre\_offset' and 'post\_offset' options.<br> This change is part of a larger clean up task for `date\_histogram` from issue #9062.[https://api.github.com/repos/elastic/elasticsearch/git/commits/d2f852a274906d6cd1d7d3631f1cd763a1fd3ce3]

# DEMO

---

---

# Evaluation

---

- Evaluation version of tool that looks at files from the first commit.
  - Compare the new files added to the resulting files in the 'Related Files' tab.
  - Of 87 new files, 17 (19.5%) files were recommended by our tool.
-
